

What is claimed is:

1. A cleaning apparatus comprising:
a one piece blow-molded body having a unitary handle and a support for receiving a debris removing member;
the handle having an open end opposite from the support; and
a cap mounted on and closing the open end of the handle.
2. to the apparatus of claim 1 wherein the support further comprises:
first and second spaced bearing surfaces adapted to support a rotatable tape roll about the support.
3. The apparatus of claim 2 further comprising:
means, carried on the support, for capturing the tape roll on the support.
4. The apparatus of claim 3 wherein the capturing means comprises:
a plurality of circumferentially spaced projections formed on one end of the support.
5. The cleaning apparatus of claim 1 wherein:
the particle removing material is a wound substrate having an adhesive outer surface.
6. The apparatus of claim 1 further comprising:
an aperture formed in the handle.
7. The apparatus of claim 1 wherein:
the cap is removably mounted on the handle.

8. The apparatus of claim 7 wherein:
the cap is threadingly mounted on the handle.
9. The apparatus of claim 1 wherein the handle is formed of a transparent material.
10. The apparatus of claim 9 further comprising:
a label mounted on the handle, the label carrying decorative indicia visible through the handle.
11. The apparatus of claim 10 wherein the label comprises:
an opaque sheet having decorative indicia on a surface contacting the handle, the decorative indicia visible through the handle.
12. The apparatus of claim 10 wherein the label further comprises:
a transparent sheet having decorative indicia viewable through the handle.
13. The apparatus of claim 9 further comprising:
an insert mountable in the handle, the insert carrying decorative indicia visible through the handle.
14. The apparatus of claim 13 further comprising:
a label mounted on the handle, the label carrying decorative indicia visible through the handle; and
the decorative indicia on the insert and the decorative indicia on the label forming an overlaid combined decorative indicia visible through the handle.
15. The apparatus of claim 13 wherein the insert further comprises:
means, carried on the insert, for fixedly positioning the insert within the handle.

16. The apparatus of claim 13 wherein:
the insert is formed of a flexible material to enable the insert to be inserted through an open end of the handle.
17. The apparatus of claim 13 wherein:
the insert is a decorative body carried with the cap and disposed within the handle when the cap is mounted on the end of the handle.
18. The apparatus of claim 17 further comprising:
a stem depending from the cap, the decorative insert carried on the stem.
19. The apparatus of claim 13 wherein the insert comprises:
a three dimensional decorative body loosely disposed within the handle.
20. The cleaning apparatus comprising: \angle
a body including a handle and a support, the support receiving a cleaning member;
a handle formed of a transparent material; and
a member carrying decorative indicia carried on the handle, with the decorative indicia visible through the handle.
21. The apparatus of claim 20 wherein the decorative member comprises:
a label mounted on the handle, the label carrying decorative indicia visible through the handle.
22. The apparatus of claim 21 wherein the label comprises:
an opaque sheet having decorative indicia on a surface contacting the handle, the decorative indicia visible through the handle.

23. The apparatus of claim 21 wherein the label further comprises:
a transparent sheet having decorative indicia viewable through the
handle.

24. The apparatus of claim 20 further comprising:
an insert mountable in the handle, the insert carrying decorative indicia
visible through the handle.

25. The apparatus of claim 24 further comprising:
a label mounted on the handle, the label carrying decorative indicia
visible through the handle; and
the decorative indicia on the insert and the decorative indicia on the
label forming an overlaid combined decorative indicia visible through the handle.

26. The apparatus of claim 24 wherein the insert further comprises:
means, carried on the insert, for fixedly positioning the insert within the
handle.

27. The apparatus of claim 24 wherein:
the insert is formed of a flexible material to enable the insert to be
inserted through an open end of the handle.

28. The apparatus of claim 24 wherein:
the insert is a decorative body carried with the cap and disposed within
the handle when the cap is mounted on the end of the handle.

29. The apparatus of claim 28 further comprising:
a stem depending from the cap, the decorative insert carried on the
stem.

30. The apparatus of claim 24 wherein the insert comprises:
a three dimensional decorative body loosely disposed within the
handle.
